INCREMENTAL COST ASSESSMENT · CM PAYMENTS B.V.

PISP Scope Extension: Incremental Cost & Delta Analysis

Evaluating strictly the net extra capital, regulatory fees, operational expenses, and annual maintenance required to add Service 7 (PISP) to CM Payments B.V.'s existing Payment Institution license.

APPLICANT	CURRENT LICENSE	TARGET SERVICE	SUPERVISORY BODY
CM Payments B.V. (R129862)	PSD2 Services 3 & 5 (DNB)	Service 7 (PISP - Annex I)	De Nederlandsche Bank (DNB)

01

Baseline Regulatory Standing & Scope

CM Payments B.V. is already fully authorized by **De Nederlandsche Bank (DNB)** as a Payment Institution (*Betaalinstelling*) for **Service 3** (payment transaction execution) and **Service 5** (issuing and acquiring). As an active licensed institution, CM.com already absorbs the baseline corporate, prudential, and supervisory overhead of holding a financial license.

Adding **Payment Initiation Services (PISP - Service 7)** does *not* establish a new financial entity. Instead, it is executed via a formal **Application for Scope Extension (*Aanvraag tot uitbreiding van de vergunning*)** under Section 2:3b of the Dutch Financial Supervision Act (*Wft*). Consequently, all corporate baseline expenses remain fixed, and only the **net incremental delta** applies.

THE INCREMENTAL ADVANTAGE

Because CM Payments B.V. already holds a full PI license, Initial Capital requirements, DNB base supervisory levies, executive director vetting, and core

annual compliance audits incur **€0 in extra costs**. The net recurring delta to maintain Service 7 is restricted to mandatory PII insurance, eIDAS certificates, and cloud KMS infrastructure (~€19.5k–€48.5k/year).

02

Key Incremental Figures (The Net Delta)

€2,700

DNB Upfront Tariff

Statutory scope extension fee vs. €10.4k de novo

€19.5k–€48.5k

Net Annual Delta

Pure incremental maintenance overhead

€0 Extra

Capital & Base Levy

Fully absorbed by existing PI standing

03

One-Off Upfront Costs: Baseline vs. Incremental Delta

The table below isolates the exact upfront capital expenditure required to secure the Service 7 scope extension, highlighting items already covered by CM Payments B.V.'s existing license:

TABLE 1. UPFRONT SETUP COSTS: DE NOVO VS. CM PAYMENTS B.V. DELTA

Cost Component	De Novo Applicant	CM.com Current Base	Net Extra Delta
DNB Statutory Application Fee	€10,400 – €15,000	Already licensed	**€2,700**
Statutory Initial Capital (Art. 7a)	€50,000 (Paid-up)	€125,000+ (Capitalized)	**€0.00**
Director Fit & Proper Vetting	€4,000 – €6,000	Board already vetted	**€0.00**
PIS Regulatory Legal Counsel	€30,000 – €60,000	In-house legal team	**€10,000 – €20,000**
PIS Pen-Testing & Security Audit	€10,000 – €20,000	Corporate ISMS exists	**€5,000 – €8,000**

Cost Component	De Novo Applicant	CM.com Current Base	Net Extra Delta
Total Upfront Outlay	**€104,400 – €151,000**	**Baseline Absorbed**	**€17,700 – €30,700**

04

Annual Recurring Maintenance: The Net Cost to Hold Service 7

Ongoing maintenance levies and compliance duties are evaluated strictly by calculating the incremental cost added to CM Payments B.V.'s current annual budget:

TABLE 2. ANNUAL RECURRING COSTS: BASELINE VS. INCREMENTAL DELTA

Item & Regulatory Driver	CM Baseline (S3/S5)	Combined With PISP	Net Annual Delta
DNB Fixed Base Supervision Levy	€4,500 – €7,500/yr	€4,500 – €7,500/yr	**€0.00**
DNB Variable Supervision Levy	Based on acquiring volume	Acquiring + PIS revenue	**+ €1,000 – €5,000**
Mandatory PII Insurance (Art. 5(2))	€0 (Not required for S3/S5)	Mandatory PISP cover	**+ €15,000 – €35,000**
eIDAS Certificates (QWAC & QSealC)	€0 (Not used for acquiring)	Annual QTSP renewals	**+ €1,500 – €2,500**
External Financial & DORA Audit	Already conducted annually	PIS module added to audit	**€0 – €2,000**
Compliance & Reporting Personnel	Active MLRO & Risk Team	Same team handles filings	**€0.00**
Cloud KMS Key Storage & Gateway	Existing AWS infrastructure	QSealC signing key vault	**+ €2,000 – €4,000**
Total Annual Cost to Hold License	**Existing PI Overhead**	**Combined PI Overhead**	**+ €19,500 – €48,500/yr**

With a PII rider instead of a standalone policy (€5,000 – €15,000), the annual run-rate falls to **+ €9,500 – €28,500 / year**.

05

Strategic Breakeven: Direct License Delta vs. Partner Aggregator

Because CM Payments B.V. only incurs the net incremental delta (~€19,500 – €48,500/year), the economic crossover point against external aggregators (Tink, Yapily, TrueLayer) is substantially lower than for a de novo fintech:

TABLE 3. INCREMENTAL DELTA VS. PARTNER AGGREGATOR ECONOMICS

Metric	Direct PISP Extension (Net Delta)	Partner Aggregator (External)
Upfront Setup Outlay	**€17,700 – €30,700 (One-off)**	€0 – €5,000 (Integration fee)
Net Annual Fixed Cost	**€19,500 – €48,500 / year**	€12,000 – €36,000 / year (SaaS base)
Marginal Cost per Payment	**€0.00 (Mandated free by PSD2)**	€0.04 – €0.08 per transaction
Annual Volume: 500k Payments	€34,000 total cost (€0.068/tx)	€49,000 total cost (€0.098/tx)
Annual Volume: 2M Payments	€34,000 total cost (€0.017/tx)	€136,000 total cost (€0.068/tx)
Economic Breakeven Threshold	**Direct licensing is cost-positive above ~40,000 to 50,000 transactions/month (~500,000 payments/year). Beyond this, every transaction runs at €0 marginal cost, yielding massive margin expansion.**	

06

Action Plan: The 4 Steps to Secure Service 7

1. **Procure Mandatory PISP PII Policy Rider**
   Engage insurance brokers (Marsh / Aon / Lloyd's) to add an EBA/GL/2017/08 compliant PISP liability endorsement to CM Payments B.V.'s policy and obtain the official DNB Insurance Declaration (*Verzekeringsverklaring*).

2. **Draft PIS Program of Operations & DORA Risk Annex**
   Update the existing risk framework with specific PSD2 Article 66 non-handling declarations and Berlin Group technical architecture specifications.

3. **Submit Scope Extension Application via MijnDNB**
   File the statutory Form *Uitbreiding vergunning betaalinstelling* on DNB's Digital Supervision Portal and settle the non-refundable €2,700 application tariff.

4 **Procure eIDAS QWAC & QSealC Certificates from QTSP**

Upon DNB approval decree, obtain ETSI TS 119 495 certificates (QuoVadis / DigiCert) containing the new `PSP_PI` role for production mTLS connectivity with Dutch and EU banks.
